Library means collection of books and other informational materials made available to people for reading, study, or reference. The word library comes from liber, the Latin word for "book". However, a library is in the process of identifying, exploring and collection of data from various sources. Contemporary libraries maintain collections that include printed materials such as manuscripts, books, newspapers, and magazines, but also art reproductions, films, sound and video recordings, maps, photographs, microfiches, CD-ROMs, computer software, online databases, and other media.
